

Raymond Recorder

VOLUME 38

Friday March 22

Number 45

Bernice Heninger and Myra Dahl spent the week-end in Lethbridge as guests of Miss Helga Anderson.

Mr and Mrs G.H. Evans are the proud parents of a baby girl born March 16.

Mrs T.O. King arrived home Sunday after three weeks spent visiting friends and relatives in Idaho.

Wilford, Richard, Mark and Edith Heninger left Saturday morning for Grent Falls where they intend to meet Mabel Heninger who has been travelling for three weeks.

The two year old daughter of Mr. and Mrs. Florann De Meester is in the hospital as the result of being kicked in the face by a horse. She had wandered away from the house and had been gone about four hours before she was found. The only clue they have as to what happened is that the little girl said "horsey, Mamma".

HOW SPUD WAS NAMED

"Spud" in common parlance nowadays means a potato, but there was a time two centuries ago when S-P-U-D stood for the Society for the Prevention of Unwholesome Diet. The Society was formed in protest against the introduction of potatoes into Great Britain. Potatoes were looked upon as something unfit for food. Consumer Section, Marketing Service Dominion Department of Agriculture.

Correction

In last weeks issue we published a report about the family program in the First Ward being the first family program to be put on without outside help. We wish to correct that statement and present our apologies to those who in past years have put on family programs without outside help. There have been a goodly number of family programs presented entirely without help from other sources.

STARVATION FORSEEN

Hon. J. G. Gardiner, minister of agriculture, said in Toronto that it was known last summer that serious food shortages would occur this winter. That is why Canada put meat on the ration list again, cut the consumption of butter, sugar and rice, banned the export of barley shipments to the United States for malting purposes and restricted the use of barley in alcohol production in Canada. All this was done while other nations were lifting rationing regulations.

Andrew Walton and his brother have returned from California and Utah where they have spent the past month.

String and choral music with Geoffrey Waddington directing is now going to radio listeners over both coast-to-coast networks of the CBC on Thursdays at 8:30 p.m. Waddington conducts strings and soloists in the Geoffrey Waddington Show for the Trans-Canada network, and on Sundays his music is heard over the Dominion network in Just a Song at 7 p.m.

District Governor Sorenson Visits Raymond Lions Club

The Sugar Bowl was the meeting place of the Raymond Lions Club Monday March 18th with Pres. Karl Wilde in the chair. Oh Canada was sung followed by invocation by Lion Wm. Wilde.

The following guests were introduced Johnny Heggie, of Raymond, Al Merkle and A. Earl of Cardston, B. Hauge and Pop Harwood of Waterton Lakes and District Governor Sorenson of Red Deer.

During the meal community singing was enjoyed.

A small token of appreciation was presented to Lion P. Moreland as a reward for procuring new members to the club. It was announced that Leo's night out was to be held in the Opera House Wed. March 27th at which the public is invited to attend. The tickets are now on sale at 25 Cents each, and can be had from any member of the Club.

E. Hauge Pres. of the Waterton Lakes Club addressed the Members announcing that 7 Lions Clubs of which Raymond is included are sponsoring the Lions Convention which is to be held in the Lakes on June 20 and 21 and 22.

Lion P. Moreland who has been appointed Chairman of the Convention asked the members to give all the support they could to make the convention a success.

Johnny Heggie who has just returned from overseas related some of his experiences while over there.

D.G. Sorenson then addressed the Assembly on the Members obligations to the Club and the Clubs obligations to the members.

Ren Mitchell was enrolled as a member of the Club after which the meeting closed in the usual manner.

SCOUT MEMBERSHIP INCREASING

An increase of 1,701 members is shown in the 1945 annual census figures for the Boy Scout Association in Canada. There are now some 94,677 Canadian Scouts compared to 92,176 in 1944. By provinces the Scout population stands as follows: British Columbia 7,567; Alberta 5,493; Saskatchewan 4,628; Manitoba 6,981; Ontario 45,219; Quebec 7,801; New Brunswick 3,388; Nova Scotia 6,171; Prince Edward Island 495; Salvation Army Scouts 1,499; Scouts Catholiques 8,600.

On Thursday noon a horse, grown tired of bounding over the freshly turned stones of main street took to the sidewalk in front of the Mercantile and with utter disregard for its own safety or the safety of others, tore madly two full blocks to the Brewerton residence corner where it turned west. If horses are going to take to our sidewalks we had better get going and have the new ones put down.

NEW BRITISH HOUSE BUILT IN SEVENTY-FIVE MINUTES

FOR ON - recently six British work men erected an all - electric aluminium house in a surprising manner. The Daily Mirror states that it was the first of its type to be built in Blackburn, North of England. These bungalows are extremely attractive in appearance, being coloured green and cream. They are manufactured in a Lancashire factory. Although bungalows such as these are intended for United Kingdom families, this will not preclude them from being helpful; considerably overseas house-building programs. It is not intended to export them - apart from immense home requirements, the shipping space required would make the proposition difficult. Overseas territories can, however, acquire blue prints of Britain's speedily built "prefabs" under licence from the manufacturers.

WEDDING

Pratt - Witbeck

On Friday March 15th at 8:30 the First Ward hall was the scene of a very pretty wedding when Dixie, youngest daughter of Mrs. Bessie Witbeck and John W. Pratt were married. The bride was given away by her brother Ted, and Best Man was the Grooms Brother Jim. Bishop J. O. Hicken performed the ceremony.

The bride wore a floor length gown of net and satin with a floor length veil and carried a bouquet of Red Roses and White Carnations. She was attended by two bridesmaids, Norma Litchfield and Jean Murdoch who wore floor length dresses of pink and blue.

Only relatives and close friends witnessed the ceremony after which a light lunch was served consisting of chicken salad, rolls, pickles, ice-cream and cookies.

The bride wore a going away suit of Brown Gabardine with accessories to match.

Relief Society Party

On Tuesday March 19th the second ward held their March 17th party in the recreation wing. A very fine program was presented and a lovely lunch was served. The program was as follows: Duet - Maj. Fairbanks and Alleen Paxman; Story - Mrs. S. B. Smith; Piano Solo - Myrtle Smith; Reading - Lucy Stevens; Song - Mrs. Geo. Court; Reading - Mrs. Hippard; Reading - Ina Froum Trio - Gen. Hawkins, Laura Watson, and Evelyn Melchior.

Dora King, Mrs. L. D. King, Zina Anderson, Mrs. Alma Hancock, Mabel Salmon, Mrs. Walker, Maybelle Anderson, Lilla Stevens, Phoebe Hall were dressed in old fashioned clothes and each represented a General President of the Relief Society and each gave the life of the person they represented.

At the lunch there were 24 tables set and they were very nicely decorated in St. Patrick motif. The younger members did the serving and four tables were allotted to two members to be decorated and served. A lovely lunch of fruit salad, sandwiches, cake and punch was enjoyed by everyone. A large number of the older Relief Society members were present.

JACKS

TROUNCE

LIONS

52 - 39

Raymond Union Jacks overwhelmed Magrath Lions in the third game of the Alberta Provincial Playdowns.

The Jacks board of strategy put their heads together and came up with a combination that had the Lions stopped cold.

Jack's led at half time 28-13 and thru-out the whole game were never in trouble, as the Lions were played off their feet.

The High man for the Jacks was Cliff Fred Turner who turned in a splendid performance, in breaking up the plays and hitting the hoop for 24 points. Leonard Rolfsen turned in his finest performance of the season as Ed Howard Hicken and Stone, for Magrath, Hicken again took top honors in the scoring dept. with 13 counters.

The next encounter will be played on Jacks floor Monday, March 25th and the 5th and final on a neutral floor.

Line up of Teams

Raymond - Mitchell 7, Stone 10, West, Mickelson 9, Hicken 5, Turner 12, Rolfsen 6, Bourne 3, Valder, Total 52.
Magrath - Rice 4, Alston 2, Hamilton 7, Coleman 2, D. Sabey 1, Blumell 13, Barker 1, M. Sabey 1, B. Bourne 8, B. Sabey, Total 39.
Officials - B. Cheesman, H. Elgham.

RURAL ELECTRIFICATION

The farmers of Alberta have every sympathy from their city cousins in their desire for rural electrification. The life of a farmer is hard and lonely at the best of times, especially for the women folk. The inconveniences they put up with would drive most city women to drink or bridge. If anybody deserves the comfort and convenience provided by electricity, it is the farm population.

It is therefore all the more important that rural electrification should be proceeded with orderly and steadily. It must be organized so that there will be no breakdown in the future, no reaction, no danger of explosion from over-inflation, rural electrification must not be made a political issue, for the sake of the farmers. Politicians should be warned against making irresponsible statements which will ultimately do the cause of electrification more harm than good. The unfortunate experience of rural telephone in Alberta should not be repeated in electrification.

These are some of the factors which must be borne in mind:

(1) Electrification is an expensive business, particularly in our sparsely settled Western Canada. Prof. Andrew Stewart, who a couple of years ago made a thorough survey in Alberta for the provincial government, found that only 52 percent of the farmers would probably take electricity and the average cost of delivering electricity to them (not generating it or distributing it once it reaches the farmyard) would be \$576. If 71 percent of the farmers could be induced to take electricity the average cost would come down to \$519.

In one Manitoba municipality a preliminary survey showed 92 percent of the farmers anxious to get hydro power, but when approached for a deposit only 63 percent paid.

(2) It is just as costly for farmers as for the power company, even before any electricity is used. In Manitoba it was found that the cost of bringing service to the farmers yard averaged \$673, and in addition the cost to the farmer of appliances, equipment and wiring was \$611.

The cost of constructing power lines to 20,000 farmers in Alberta is estimated at \$12,000,000. This is only the first cost for on top of that it is estimated that the cost to the farmers for wiring, appliances and equipment would be \$13,500,000.

Are the farmers able to pay this? In Manitoba almost half the farmers said they would need help to finance their end of the electrification program.

(3) There is a serious shortage of equipment. The representative of a major electrical company said in Calgary last week that only 10 percent of the desired amount of wire could be turned out in the first quarter of 1946. Manitoba had a program for electrifying 5,000 new farms this year, but has already cut its objective to 1,500.

(4) Are very many farmers ready for electricity? Do they understand that for a farmer it must be more than a convenience? For instance, in Manitoba 50 percent of the farms ordered iron, but only 15 percent of the farmers ordered electric ranges. If it is used only for lighting the house and heating an iron, it shouldn't be considered at all, only when it is taken into the barn, the granary, the pump house, etc. Is it worth while for the farmer. That is why the farmer has to pay a large minimum bill for electricity over and above that for an extremely low rate.

Canada's Utilities has found that five percent of the customers in the Swallow area use less than minimum of 20 kilowatt hours per month, paying therefore more than 25 cents for each kwh. Electricity is of little use to these customers. It is a luxury in more than 100 kwh's per month. On the other hand 41 percent are used at a cost of less than 7 cents each. These people are making electricity work and making it pay.

These are some of the many considerations involved in a program of rural electrification. They indicate electrification is coming, but discredit the magnitude of the problem. Rural electricity can certainly impede it. Reprint from Calgary Albertan, March 8th 1946.

NEW BOOKS

Winter Meeting - Ethel Vance
Burma Surgeon Returns - GORDON S. Seagrave M. D.
The River Road - Frances Parkinson Keyes
The Mysterious Universe - Sir James Jeans
While You Were Gone Edited by Jack Goodman
Showdown - Errol Flynn
A Book of Comfort - Eric Parker

R. G. (Bob) Shannon has joined the staff of the Bank of Montreal. Bob has just recently returned from the Navy and is a native of Lethbridge.

Ted Meeks suffered a broken leg Wednesday when a tractor wheel he was unloading slipped and fell on him. The break is high in the thigh.

Miss Ha Hicks who for a number of years has been in the States has been appointed secretary to the Indian delegate to the International Monetary meeting now taking in Atlanta, Georgia. In a letter to her mother and family here in Raymond, Ha has sent clippings of the happenings in Atlanta. Ha is going to Cuba in a short time to work for the British Consul for a few months.

Happiest place in town today was King Motors where a new 1946 Ford car went on display for the first time. "There's no doubt about it," enthused Shirley, compared with their immediate predecessors, these cars pack more styling, engine and chassis improvements than we've seen in any one model year since they first introduced the V-8s back in 1932. There are 20 important improvements under the hood alone."

L. D. and Shirley cordially invite you to come in and get full particulars on the new V-8 and Monarch cars.

Joe Mclean and Emma Dahl Honored

After Choir practice on Thursday evening members of the Ward entertained in honor of Joe Mclean, retiring Choir leader and Mrs. Emma Dahl both of whom have served a long term as choir leader and Organist respectively. A short program was followed by games and a lunch with the rest of the evening spent in dancing. The program as follows: Reading - June Anderson, Trio - Laura Watson, Evelyn Melchior, Gen. Hawkins. Musical Reading - Helen Plegrass, Saxophone Solo - Hyrum Fromm.

As a token of service Joe was presented with a fine travelling bag and Emma was presented with a beautiful bouquet of flowers.

Jean Dean is the skilful accompanist of the Four Gentlemen of the Old Songs, (CBC Trans-Canada network, Sundays, 9:15 p.m.). Miss Dean's light touch often makes the quartet sound as if unaccompanied, while at the same time effectively marking the time and pitch.

Peacetime Problems

DURING THE WAR Canada rose to a foremost place among the nations of the world. The rapid advances made in the production of food and manufactured articles, in shipping, in science, medicine and many other lines of endeavour were very great, when considered in relation to the size of the population here. These results were achieved because the entire country was organized for the purpose of giving the fullest support to the winning of the war. In time of war there is almost nothing which is considered impossible to accomplish in the interests of speeding victory. When difficulties arose in production, transportation, or other vital places, expert advice was obtained and remedies were quickly provided. These methods, which proved so effective in war, should be equally useful in dealing with peacetime problems, some of which have already appeared in the form of the housing shortage, unemployment and the world food shortage.

Demand Here Is Not Sufficient

In deciding future policies, both in internal affairs and in regard to our relations with other countries, there is need for continued public interest and co-operation in all that is undertaken. It is evident that there are opportunities for expansion here in many lines, in agriculture, in mining, in manufacturing and in scientific and cultural endeavour. Canada is possessed of great potentialities, but if they are to be developed to their fullest extent we must have either a much larger population or greatly expanded markets. The present population cannot absorb even the greater part of the products of our farms, factories, mines, forests and fisheries. This is a problem which vitally concerns the future development of this country and which will have a far-reaching effect on such matters as taxation, employment and farm prices.

Much Acreage Still Unused

In agriculture there are opportunities for great development. Mr. J. F. Booth, associate director of marketing for the Dominion Department of Agriculture, recently stated that there are between 25,000,000 and 27,000,000 acres of land in Canada, which are unused, but are reasonably accessible and could be used for agriculture. These figures did not include land in the Yukon or the Northwest Territories. Mr. Booth estimated that this land would provide from 158,000 to 168,000 farms, including irrigated units. He pointed out, however, that these areas would be brought under cultivation only if Canada had a larger population or a greatly increased foreign market. These figures show the possibilities for the expansion of agriculture, and this is only one of the many potentialities of the country. To deal wisely with these matters we need the same type of co-operation and skill which contributed in so great a measure to the winning of the war.

GREAT NAVAL BASES

Two In Northern Ireland Helped In Defence Of Convoys

The Governor of Northern Ireland, Vice-Admiral the Earl Granville, has cited some remarkable facts and figures showing the outstanding importance of Belfast and Londonderry as naval bases during the war. "Those two ports," he said, "located on the flank of the immediate exit to the Atlantic from Great Britain, played a most important part in the vital defence of convoys. No fewer than 85,493 ships were escorted on ocean convoys during the war and of these only 649 were lost."

As for Belfast's shipbuilding activities in wartime the Governor mentioned that as a result of the excellent facilities in the port repairs to merchant vessels amounting to nearly five million gross tons were completed. One of many remarkable facts was the almost complete rebuilding of the White Star liner *Georgic* which has recently been carrying troops home from liberated areas in the Far East. H.M.S. *Formidable*, built at Belfast, had a brilliant wartime record. She took part in the attacks on the Tokyo region by a British task force. Another Belfast-built ship was the light fleet carrier *Glory*. She too has been operating in the Pacific, and appropriately took the surrender of the Japanese forces in New Ireland, besides New Guinea, New Britain and the Solomon Islands.

HOLLYWOOD BIDS Several Hollywood producers have made offers for screening rights of the book, "The Long November," written by James Benson Nablo of St. Catharines, Ont. Mr. Nablo is now in Hollywood, where several motion picture houses have made offers for rights to screen his story of the impressions of a Canadian infantryman at the front in Italy.

GEMS OF THOUGHT

ASSURANCE

The shortest and surest way to live with honor in the world, is to be in reality what we would appear to be. —Socrates

It is wonderful what strength of purpose and boldness and energy of will are roused by the assurance that we are doing our duty. —Scott

Anxiety is a word of unbelief or unreasoning dread. We have no right to allow it. Full faith in God puts it to rest. —Horace Bushnell

Trust Truth, not error; and Truth will give you all that belongs to the rights of freedom. —Mary Baker Eddy

When you have read the Bible, you will know it is the word of God, because you will have found it the key to your own heart, your own happiness and your own duty. —Woodrow Wilson

Before me, even as behind, GOD IS—and ALL is WELL. —Whittier

Not Hard Task

Rehabilitation Of Women In Canada Has Been Satisfactory

Rehabilitation of women who served in the armed forces had not been the problem expected, Dr. Olive Russell of Ottawa, executive assistant to the director-general of rehabilitation, Department of Veterans Affairs, said.

Addressing a women's rehabilitation conference in Saskatoon, Dr. Russell said about 21,000 women had been demobilized and all but approximately 400, as far as she knew, had been successfully rehabilitated. Ex-Servicewomen were showing initiative and adaptability and had a definite contribution to make to any community.

URANIUM DEPOSIT

The largest deposit of uranium known in the world has been discovered in Australia, near Stanthorpe, Queensland. The London Daily Mail quotes the general secretary of the Australian Workers' Union as declaring further that the ore in this deposit yields the highest known percentage of uranium; samples sent to London having assayed three per cent. uranium.

Price Control And Rationing Information

Q.—If a tenant accepts a dwelling with the written agreement that he is renting same for a period of five months, can he be given notice to vacate if he refuses to move when this five-months' period is terminated?

A.—Yes, if the lease is for five months only, the owner may expect to regain possession at the end of that time. This lease for five months is called a "term certain" lease and the tenant is not entitled to any notice to vacate.

Q.—Are we going to have canning sugar this year?

A.—Yes, in 1946 each consumer will be allocated ration coupons to purchase ten pounds of sugar for canning purposes. You will be advised in the near future which coupons will become valid for this purpose.

Q.—Is there a ceiling price on a 1932 used car?

A.—Yes, there is a ceiling price on all types of used cars, no matter what year they were manufactured. Contact your nearest Wartime Prices and Trade Board office for information on ceiling prices for cars and trucks.

Q.—I wish to secure some maple syrup from Ontario. How should I do this?

A.—Consumers buying direct from producers must obtain purchase vouchers from their local ration board and mail these vouchers to the producer. It is illegal to send loose ration coupons through the mail.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

Takes Entire Output

UNRRA Buys All Horse Meat United States Packers Can Supply

Two million pounds of United States horse meat has been shipped to foreign nations but the United Nations Relief and Rehabilitation Administration has requests for 300,000,000 pounds more and has told packing plants it will take their entire output for 1946.

An U.N.R.R.A. spokesman estimated, however, that only about 100,000,000 pounds will be available.

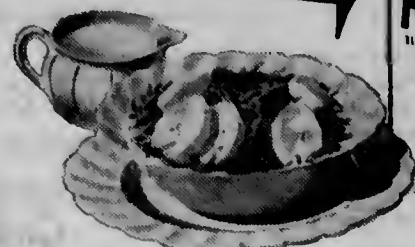

The meat is purchased by the agriculture department for canning or curing in Federal-approved horse-meat processing plants. The ceiling price is 13 cents a pound, at the plant, for cured or pickled meat and 16 cents for canned.

U.N.R.R.A. also is aiding European nations to replace the thousands of work horses killed during the war. The lack of them has delayed farming. Draft mares are being shipped abroad for breeding and as work animals.

Adequate Supplies

Canada Has Ample Seed With Exception Of Red Clover

With the exception of Red Clover seed, Canada was assured of adequate seed supplies to provide for the 1946 seeding requirements, said Howard Gorsline, Senior Marketing Assistant of the Plant Products Division, Dominion Department of Agriculture, in a recent address at Toronto on "Requirements and Supplies of Seed in Canada." As in other years, Mr. Gorsline pointed out, there would be certain varietal shortages but the over-all supply of good quality seed oats, barley, wheat, corn, peas, beans and oil-bearing crops was satisfactory. At the same time, the supply of field root and garden vegetable seeds was more than adequate to fill the demand.

With regard to red clover seed, the Ontario and Quebec crops encountered unfavourable harvesting conditions in the fall of 1945, with the result that the total crop amounted to about 3,000,000 pounds, or 40 per cent. less than the 1944 harvest. However, a carryover of more than one million pounds held by Canadian seed firms, and the movement eastward of a large proportion of the 1,200,000 pound crop of single cut red clover in Alberta would bring the total supply relatively close to providing normal Canadian requirements estimated at 6½ million pounds. Although not as desirable as the medium cut clover, the single cut clover from Alberta would fill a definite need in many districts.

THE ONLY CURE

In Mineola, N.Y., drunken drivers will be tested by making them say: "Around the rough and rugged rocks the ragged rascal ran." This is sheer foolishness. The only accurate test for alcohol is a blood-test, as employed in Norway. And in Norway, we should like to point out, drunken driving is virtually unknown because it is punished very severely.

PENICILLIN FOR CATTLE

Research scientists in Britain are using penicillin to cure dairy cattle of mastitis, one of their most serious diseases, reports the Manchester Guardian. The results are "almost too good to be true," says Prof. Scott Watson, chief education and advisory officer of the ministry of agriculture.

A medical man says that those who live longest are those who never do anything in a hurry. This should encourage parents who worry about the length of time it takes their children to go to bed.

The Premier Beef Breed

The smoothness, quality, fleshing properties and hornless character of Aberdeen-Angus cattle have commended the breed to beef producers in many lands. The breed can also serve you.

BUY AN ABERDEEN-ANGUS BULL and proceed by the most effective method to produce market topping cattle. In the realm of beef production Aberdeen-Angus cattle are SUPREME.

Value Of Tooth Health

Neglected Tooth May Lead To Chronic And Serious Disease

Tooth health has its effect on the entire body. A decayed tooth if neglected may lead to chronic, serious or even fatal disease.

Such is the admonition in a pay-roll pamphlet insert—"See Your Dentist Twice a Year"—issued by the Industrial Division of the Health League of Canada.

The pamphlet states that authorities are of the opinion that carbohydrates seem to be the greatest source of tooth decay and should be used in strict moderation. On the other hand, uncooked foods such as green vegetables, raw fruits and dairy products, are good for the teeth.

"After diet comes exercise," says the Health League pamphlet. "Teeth need exercise to be healthy. Vigorous chewing does the trick." Teeth should be brushed after every meal, the uppers downward and the lowers upward. The top surface of back teeth should be brushed vigorously, and the mouth should be washed out with clean water.

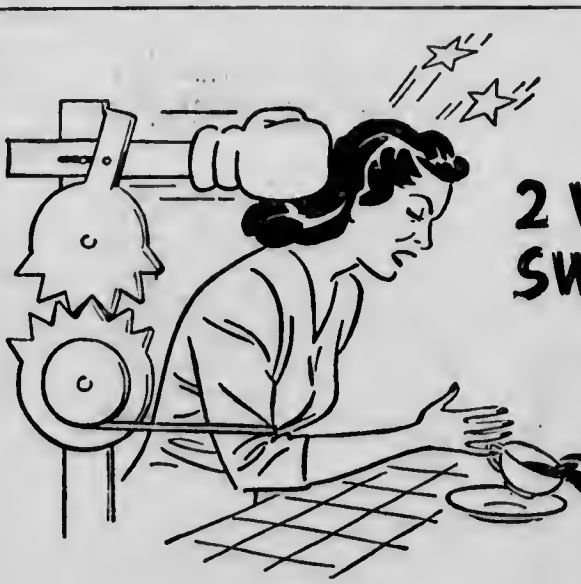

Sounds Simple

Compact Appliance For Motor Cars More Efficient Than Chains

Some ingenious devices have been born of the war. Now comes a simple, compact appliance, in the form of a tire-track, that will pull a motor vehicle out of mud, ice or snow, where chains would never prove efficient. It consists merely of seven small, but heavy, steel plates, all hooked together, that provide a two-foot runway. No jack is needed. Just drop it in front of a rear wheel and attach a cable to the bumper. When clear, you fold it up to a size no larger than a cigar box. Strangely that, of all the motorists who have huffed and puffed, made the air blue as they stripped the gears of their cars, none has ever thought of it before.—Hamilton Spectator.

The jet-propelled P-80 Shooting Star could cross the Atlantic in a single morning.

2 WAYS TO SWEAR OFF

Are sleepless nights warning you to stop drinking tea and coffee? Has a friend told you how much better she has felt since she got rid of caffeine? And do you dread the idea?

The Hard Way

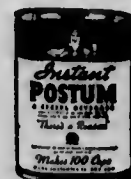

Some snappy device like this handy gadget would be one way to crack down on your desire for tea or coffee. A bit impractical though!

The Postum Way

Drink Postum instead! Such a delightful way. Delicious flavor, hearty warmth and aroma. And not a trace of caffeine or any other drug to upset nerves or digestion.

Easy to fix. Make Postum right in the cup, just by adding boiling water or hot milk. Costs less than 1¢ a serving.

Postum

A Product of General Foods

Jobs Follow Organization

But Employers and Workers Must Assist

During the war organization of manpower was made possible through co-operation of employers and workers.

This co-operation is no less necessary to assist in organizing the employment market during the present critical period.

Some manpower controls still remain. These are still law. They are aimed at assisting in organizing the employment market.

Remaining controls are designed to help employers and workers—and actually require only minor assistance from the public.

YOU ARE URGED TO COMPLY WITH THE FOUR CONTROLS WHICH REMAIN:

- 1—Employers MUST notify the National Employment Office of any need for workers, as soon as that need is known.
- 2—Where employers engage workers outside the National Employment Service they MUST notify the nearest NES Office within three days, that an employee has been engaged. (Form NSS 312 is provided for this purpose.)
- 3—Unemployed workers seeking employment MUST register with the National Employment Office if unemployed for seven consecutive days.
- 4—Generally speaking, any employer or employee MUST give seven days' notice to the other party of any intention to terminate employment. (Form NSS 120 is still required.) Exceptions may be learned from the nearest NES Office.

The partners to industry—employers and employees—should help the National Employment Service to promote a high level of employment by complying with these simple rules.

Only with public support can an employment service give full assistance to the community.

Make full use of the Local Office of the National Employment Service. It is there to serve your needs, and those of the entire Community.

Raymond

Glenwood, Alberta, March 8, 1946.
Editor, Raymond Recorder, Raymond.
Dear Sir: I have been helped so much by using carrot juice that I would like to pass it on and let it help where it can. I am sending you the copy of an article that the Cardston News published for me if you want to copy it in your paper I think it will do a lot of good. I have nothing to sell, but lots of friends down your way that some of them could use it.

Yours truly,
Enoch C. Lybbert

Editor, The Cardston News:
I would like to tell your readers what carrot juice has done for me: on the 6th of October, 1936, I was examined by Doctors Woodcock and Walkie of Lethbridge. They said I had cancer of the throat (just back of the pallet).

Dr. Walkie advised me to go to Rochester as soon as I could.

My throat started to be sore about three months before and had gotten so bad that I couldn't speak plainly and after the examination. If I tried to swallow a spoonful of water, half of it would spurt out of my mouth.

It happened that Mrs. E. A. Law had been here in Glenwood and found her daughter, Mrs. Lorin Nelson, with a bleeding gum, on which a growth had developed and which she had cut and burned off in Calgary and Lethbridge over 30 times, but it came back and bled and bled.

Mrs. Law had been treated for something and cured by carrot juice, and knew of many cures by the same, so she started her daughter on carrot juice.

In one week the bleeding had stopped and in two weeks she was well. I started on carrot juice and on the second day the burning had stopped and the swelling commenced to go down. In a short time I could speak

When your hair falls out...

Silvikrin

The Concentrated Natural Hair Food

Prevents and restores falling hair. Promotes hair growth, keeps the scalp healthy; removes dandruff almost overnight.

Place a bottle on your dressing table today.

Silvikrin is the only natural hair food, invented by the famous biologist, Doctor Weidner and endorsed by scientific authorities of the whole world. It feeds the hair roots as it contains all the 14 constitutive elements indispensable for the growth of hair.

RAYMOND PHARMACY

WEEKLY LETTER

WEEKLY LETTER

The question is frequently asked, "Is it advisable to grow flax in combination with other grain rather than by itself?" There are advantages and disadvantages to the system of combination cropping and these should be taken into account when the use of it is being considered. The advantages of combination cropping are: 1. It is easier to cut flax when it is grown in a mixture with other grain than when it is grown alone. 2. Flax in combination with other grain will fight weeds much better than when sown alone. 3. If the land is liable to crust wheat seedlings can push their way through for the flax to emerge. 4. While no definite data are available there is reason to believe that flax grown in combination with wheat is damaged less by grasshoppers than when grown alone.

The chief disadvantages are: 1. Flax should be sown fairly shallow and under certain conditions it is necessary to seed the wheat and flax

plainly, and was not bothered to speak any more only with plenty of spit tng.

I am nearly cured but not quite, as it breaks out in one place then in another, but I keep it down with carrot juice.

I have also cleaned up sinus trouble and prostate gland trouble that only took a short time.

My wife also cleaned up a goitre in about two months. I used to take about one quart of juice each day and a little less now.

Diet, no liquor, tobacco, tea, coffee nor meat.

You can get a book on carrot juice cures and diet by writing: Mary C. Hoyle Foundation, Scott Building, Salt Lake City, Utah.

Don't peel carrots or scrape them. I am a much better man to-day than I was 9 years ago I will be glad to help anyone.

Yours truly,
Enoch C. Lybbert

separately. 2. A crop of wheat and flax mixed is more difficult to pick-up and it is practically essential to separate it. 3. The grades of flax is frequently lowered on account of broken wheat particles. Manufacturers of linseed oil object to these as they reduce the percentage of oil extracted.

Where there is not too much risk of producing a satisfactory crop of flax by seeding it alone it is possible to seed it that way. Under favorable conditions flax can be expected to yield approximately 100 bushels per acre as against 200 obtained from wheat.

A mixture of wheat and flax is likely to prove successful only in the parts of the province where a reliable moisture supply is normal. Experiments have been conducted at the Lethbridge Experimental Station on irrigated land over a period of five years in seeding wheat and flax in different combinations. From results obtained a mixture of half a bushel of wheat and half a bushel of flax per acre appears to be a satisfactory combination.

When deciding to grow wheat and flax in combination the time of maturing of varieties used is important. Marquis wheat and Alton 12 mature at the same time and can therefore be used together, but if an earlier variety such as Red Bobs 222 is chosen, then also an earlier variety of flax, such as Red Wing, should be chosen.

From observations made throughout the district as well as the Experimental Station it appears more advisable to seed flax alone than in combination.

It is not advisable to seed flax in combination with oats or barley, as the rapid growth of those crops and the heavy leaf system tends to smother the flax and oats or barley separately.

"Boy -
am I glad
I saw my
Bank Manager!"

"Belly and I were worried...we were urged to invest our savings, including my service gratuities, in what we thought might be a good business proposition. My bank manager showed me why it wasn't so good... maybe saved us from losing all we have!"

If you are an ex-serviceman, getting re-established in civilian life you will find your local Bank Manager a useful man to consult.

He is familiar with local business conditions and opportunities; he is glad to give helpful information to any veteran who comes to see him.

He knows the hopes and fears, joys and worries of small business men, wage-earners and salaried workers, because he has been talking to them over many years—considering their problems, lending them money, rendering them service in many ways. He'll be glad to do the same for you.

Why not talk to him at the first opportunity? Veterans all over Canada are saying: "Boy—am I glad I saw my Bank Manager!"

WORLD HAPPENINGS
BRIEFLY TOLD

The United Kingdom will spend £25,000,000 (\$111,250,000) on its secret service in 1946 against a token £100 (\$445) in 1945.

The United States war department announced an intention to make a fuller use of Negro manpower both in the peacetime regular army and in the event of a future war.

Lord Nuffield, British industrialist, who was recently in Capetown on his way to Australia, said Britain will soon be able to supply the dominions with a steady flow of goods.

In shirt sleeves and apron, a porter at a Glasgow auction bought a 10-stone diamond necklace for £5,100. He was buying for a Glasgow man who wanted to remain anonymous.

Recent foreign economic administration surveys indicate that millions of Europeans are living far below the minimum of 2,000 calories a day.

Bertram C. Webber, 87, for many years associated with the Dominion Meteorological Bureau, died at his Toronto home. He joined the meteorological staff under Sir Frederick Stupart.

The British taxpayer can expect little relief from Hugh Dalton, chancellor of the exchequer, in his April budget. Civil and defence estimates indicated 1946-47 government outlay will be about £4,000,000,000.

Bermuda girls, white or colored, may apply for training in England for nursing. Details of the scheme are announced in the colony for a training period of three years or more and applications are invited.

Col. Arthur Welsh, minister without portfolio in the Ontario Government and minister-designate of the new Ontario Tourist Department, said that 20,000,000 United States residents are expected to visit Canada this year.

Weight In Diamonds

Aga Khan Principal Figure In Colorful Ceremony At Bombay

In a setting of fabulous Oriental splendor, the Aga Khan seated himself on a specially constructed scale before 60,000 of his followers and watched solemnly while his weight was matched, pound for pound, in diamonds. He weighed 243½ pounds.

With legendary pageantry quarts of industrial diamonds and handfuls of glittering gem stones were deposited upon the scales until there were 243½ pounds of them, balancing the weight of the spiritual leader of the Ismaili Moslems. From his gold-brocaded chair on the scales the Aga Khan bestowed benign salaams and blessings.

Biggest diamond of the lot was a sparkling 32 carat polished blue gem which the owner valued at \$200,000. The diamonds will be bought mostly by Princes and Rajahs and the Aga Khan receives the cash value—roughly \$2,200,000—to be used for Ismaili welfare and for benevolences among the poor.

The ceremony, honoring his 60th year as head of the sect, was followed by followers.

Rulers and moguls—and 10 years ago the Aga Khan himself—have been weighed in gold, but his followers averred this was the first time anyone had been weighed in diamonds.

The ceremony climaxed a week of celebration of the ruler's leadership but there was a deeper significance. It was the greatest moment in his family history since his grandfather, more than 100 years ago, was driven from Persia (Iran) after a quarrel with the Shah, for whom he had been a favorite warrior leader. India has been Ismaili headquarters since that quarrel.

The Iranian consul and an Ismaili delegation from Iran were present at the ceremony and joined the crowd in prayer for the Aga Khan, chanting "Allah ho akbar"—"Allah is great."

WILLING TO TAKE CHANCE

The smiling, confident young man entered a New York bank. He stepped up to the manager's desk.

"Good day, sir," he announced. "Has your bank any need of a highly intelligent, college-trained man?"

The manager poised a pencil over a form. "Your name?"

"Gradwell Lesserman."

"Experience?"

"Just out of college."

"I see said the manager. "And what kind of a position are you seeking?"

"Well," mused the young man. "I want something in the executive line. A vice-presidency, for example."

The manager put down his pencil. "I'm really very sorry," he said, sarcastically, "but we already have 12 vice-presidents."

The young man waved a hand. "Oh, that's all right," he stated, happily. "I'm not superstitious!"

Carrots, beets, and other vegetables are grown on the sod-covered roofs of their cabins by Alaskan soundings.

The mongoose, killer of slow-moving cobras in India, cannot cope with the faster poisonous snakes in the new world.

ARMY CHAMPIONS—Winner of the Military District No. 12 hockey championship, was the entry from No. 12 District Depot, Regina, shown above. The Depot squad nosed out Maple Creek by two straight wins in the finals played in Regina. Back row, left to right—Capt. S. Niven, Regina, manager; J. R. Oberhoffner, Regina; W. J. Huggins, Regina; A. Laslo, Regina; J. G. Roseborsky, Yorkton; G. E. May, Regina; G. D. Menzies, Regina and Prince Albert; M. P. Kelly, Kerrobert; R. Syrette, Crutwell. Front row, left to right—A. Klein, Kildaly; P. J. Seiferting, Sedley; R. Geres, Gravelbourg; S. F. Andrunyk, Saskatoon; and G. J. Bannon, Winnipeg.

GARDEN
NOTES

Mata Vegetable Groups

Vegetables divide themselves into three main planting groups. In the first are the hardy things, those one plants just as soon as the soil can be prepared regardless of the weather ahead. These will stand lots of frost and in fact for best results they must make their first growth while the weather is still cool and wet.

In this class are peas, the first onions, carrots and beets, radish, spinach and lettuce. These can be planted just as soon as the soil has worked up nicely and is no longer muddy. Experienced gardeners make a practice of sowing beets, radish, spinach, etc., at least three times, about two weeks apart.

Then there are the semi-hardy things like potatoes, the first corn, beans and cabbage. These will stand cool weather but very little frost. At the end of the line are very tender plants that can stand no frost at all such as melons, cucumbers, tomatoes, pumpkins.

Sow Grass Early

Grass makes its best growth in the cool, moist weather of spring and fall, hence garden experts advise doing lawn work just as soon as possible. This means as soon as one can walk on the lawn without getting the shoes muddy. This advice applies both in starting new lawns and repairing old ones.

Seldom is it advisable to sow a straight variety of lawn seed, and never in the case of the general family type of lawn. Seed houses put up special mixtures for this purpose, a blend of several different kinds of seed.

Grass, like any other plant, will thrive best in good, rich soil and it is never advisable to sow without good preparation. This means at least one thorough cultivation before seed is sown, working up the top as fine as possible, and if necessary also working in a layer of rich, fine loam.

It is highly important that all holes are filled in evenly and pressed down as it is much less difficult to get the ground level before the lawn is established than afterwards. For obvious reasons now on a windless day, and to get an even coverage it is a good plan to broadcast once across and once lengthwise. Follow the directions carefully as to the amount of seed to use. There is no economy in sowing lightly. With favorable weather the lawn should be ready for cutting in about six weeks, and a sharp lawnmower is essential to prevent tender, young grass from being pulled out. Grass on good soil or fed once or twice each season with a good commercial fertilizer will outgrow most weeds. Strayed lawns are usually the weedy ones.

Building Up The Soil

Practically everyone knows that a rich, open loam which is easily cultivated makes the best garden soil. But not so well known among beginners especially is the fact that even the toughest clay and the most barren sand can, with a little skill and care, be made into fine gardens too.

The secret in both cases is cultivation, plus the incorporation of rotted vegetable matter. One of the best treatments, of course, is plenty of barnyard manure, but this is not always available and especially so in urban locations. Good substitutes are vegetable refuse like tops of beets, carrots, pea pods, lawn clippings, etc., or specially sown green oats, rye or clover dug or plowed under.

Super-Heat Material

Evolved By Britain's Wool Industry After Years Of Research

Britain has produced a blanket weighing less to the square yard than any other in the world. Shrink proof, moth proof and rot proof, it weighs only thirty-three ounces—for a full size. It looks like a quilt, has pure fleece stuffing with a Portsan silk fabric cover, and traps millions of air pockets in the fleece, giving the maximum warmth with the minimum weight. Dressing gowns, bed jackets, cot-covers—all can be stuffed with the super-heat material, which was evolved after years of research by Britain's wool industry. Production of the new blanket at present is intended for export.

One machine tabulating 400 names a minute and running 40 hours a week would require two years and eight months to count all the people in the United States.

HITLER'S CHALET WILL BE SERVICEMEN'S HOME—Berchtesgaden is one of the cities and towns selected in Germany and Austria where thousands of American families will live when the occupation soldiers' wives and children start arriving. Some of the families will be able to set up housekeeping in Berchtesgaden beneath Adolf Hitler's shattered, high-perched dwelling. Photo shows what was Hitler's chalet at Berchtesgaden.

Will Be Greater

Canada Can Grow But Process Will Take Some Time

W. L. Clark, in the Windsor Star, says: Anyone can take pencil and paper and declare that Canada can never have any more than 20,000,000 people. It is easy to sell Canada short. Many people have been doing that for many years.

There is no limit to the number of people this Dominion can have. If Great Britain can have a population of between 40,000,000 and 50,000,000, surely this country can support at least as many.

Growth may be slow, because there will not be the floods of immigration there were early in this century. Yet, there are thousands of people anxious to come to Canada, believing this Dominion offers better opportunities than any other country.

People in Europe are living in constant dread of a new war, believing one will come within the next generation, if not within the next few years. They think that Canada offers a homeland where their children can be brought up without fear of war devastating the countryside every so often.

This country is great, will be greater.

Nothing Wasted

Rice Sent To England For Wedding Put To Good Use

It is difficult for the average civilian on this lucky continent to realize just how short is food across the Atlantic. Perhaps this little story, from the Northwestern Miller, may help.

Some time ago, in Ipswich, England, Lieut. John Holbauer, of Milwaukee, Wis., wrote his parents of his coming wedding to an English girl. Shortly afterwards he received a package from home which contained the rice that had been thrown at his parents' wedding more than 26 years ago. They had saved it to be tossed at their son's nuptials. It wasn't tossed at the young couple when they left the church, however, but it did appear at the wedding—as a rice pudding.

Nobody throws away rice or any other food in England.—Financial Post.

ASSURANCE FOR POLES

A foreign office spokesman said the Warsaw government had given "explicit assurances" that Polish troops abroad returning to Poland would not be molested because of political beliefs, and British officials predicted their early demobilization.

REG'LAR FELLERS—Quite Exclusive

Influenced Morale

Nelson Column In Trafalgar Square Helped Londoners Through Blitz

The periodical examination has again taken place of the Nelson Column in London's Trafalgar Square. W. Larkins, a steeplejack, made the perilous ascent of 145 feet. Having reached the summit of the pediment, he went on to examine the colossal figure of the Great Admiral. When he had descended again to the square, it was to report that all was sound and solid.

Surely the survival of the Nelson Column is one of the most astonishing features of London's long ordeal by bombing. For the column stands at the centre of one of the most important squares in the crowded Westminster district, surrounded by the historic monuments and the government offices which were the favored targets of the enemy. It might have been thought, indeed, that the authorities would have taken the column down, not only for its own protection, but to avoid wide damage which would have resulted had it toppled in any direction.

But the Nelson Column was left standing, and it stood to witness all the sudden crash and ruin, the weird night effects of wild fires and sweeping searchlights. Indeed, it so happened in 1943, with the blitz recently past, and the V-bombings soon to come, that the column marked the one hundredth anniversary of its erection.

No doubt the figure of the Great Admiral, standing with composed resolution on its singularly exalted and exposed position, was not without its influence in maintaining the morale of the city. And no doubt if the historic figure had come to life in the midst of London's ordeal, it would have spoken the identical words that Nelson himself used when under fire at the battle of Copenhagen: "It is warm work; and this day may be the last to any of us at a moment. But mark you! I would not be elsewhere for thousands."—Montreal Gazette.

ISLAND IS GROWING

Yokosuka, the world's newest "island", 200 miles south of Tokyo, has broken up into two steaming volcanic masses. Rising to a height of 70 feet and growing larger, the twin humps are almost identical in size and shape and are separated by a 50-foot channel of boiling, swirling water. White steam rising nearly 300 feet constantly puffed out from the fissures around the brown base and sides of the active mass.

MAKING THEM WORK

The Wall Street Journal tells this story. For more than an hour, the candidate for the Legislature had diligently sawed wood in his quest for the rural young widow's vote. Now she came from the house, smiling her approval, as he mopped perspiration from his brow.

"I declare," she said, "I don't know who to vote for—you or Mr. Billings. Why, right now, he's in the kitchen churning."

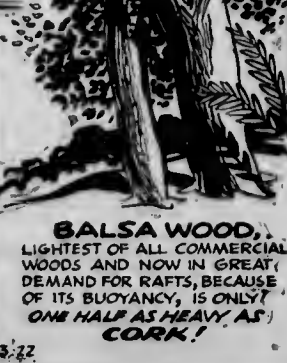

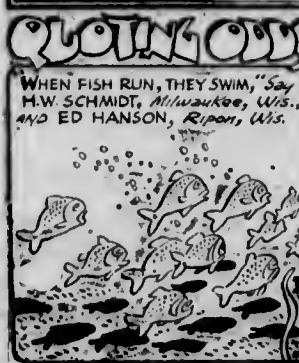

Most nuts are at least half fat and are so high in protein that they can alternate at times for meat in a main dish.

For First Time World Is Facing A Wheat Famine

LONDON.—There is a world famine for the first time in history. There have always been local famines, but never before a world-wide shortage. It is primarily a wheat famine—bread is in jeopardy, and Europe, the biggest single producer and biggest importer, faces the gravest peril.

The experts say the world is short of 5,000,000 tons of wheat, and 3,000,000 tons of rice, the substitute for wheat in large areas of Asia. This shortage, declares Doctor Henry Richardson, authority on soil fertilization, means that three times as many people will die of starvation in the next six months as were killed in the whole of the war.

The number of potential famine victims at the end of six months is estimated at 60,000,000 dead.

It was not until the middle of January that it was realized that for the first half of this year the wheat-consuming countries would be 5,000,000 tons short of the 17,000,000 tons they need.

A failure in the harvest in almost every grain country in the world has been reported except in the United States.

First Australia and Canada reported poor wheat prospects. Then Italy, North Africa, Greece and Yugoslavia announced bad yields owing to the drought. Poland, Czechoslovakia and Rumania followed with similar news. The South American countries came next and finally India and South Africa admitted to crop failures.

Europe's own production of wheat has fallen catastrophically. Before the war it averaged 42,000,000 tons. Last year it was no more than 23,000,000.

QUOTA RAISED

Industrial Users Will Get More Sugar After April 1

OTTAWA.—An increase of 10 per cent. in the sugar quotas for industrial users has been announced by the prices board. There was no change in the ration for household use.

The industrial increase, which coincided with a similar increase in the United States, was described as partially compensating industrial firms for the higher demand resulting from increased production.

The board said the increase was a partial step toward restoring the former balance between household and industrial sugar users. The increase will apply to the second quarter of the year, starting April 1.

The new industrial quota rate, based on established usage in the same period of 1941, will be: Bakers, 70 per cent.; biscuit and breakfast cereal manufacturers, 65 per cent. and other industrial users—principally soft drink and candy manufacturers—60 per cent.

The new rates are 10 per cent. above those that have been in effect for the last nine months but are 10 per cent. below the rates in effect a year ago and 20 per cent. below the rates in effect throughout most of 1943 and 1944.

CZECH AWARDS

Three Canadians Receive The Military Cross For Outstanding Service

OTTAWA.—Defence headquarters announced the award of the Czechoslovak Military Cross to Lt.-Col. W. B. G. Reynolds, 33, of North Bay and Montreal, Maj. D. D. Sweeting, 33, of Winnipeg, and Maj. T. J. E. McClelland, 33, of Quebec.

Citations accompanying the awards said Lt.-Col. Reynolds planned the air support for the units of the independent army brigade group which took part in the offensive Nov. 5, 1944. His "brilliant planning" helped considerably to make the action a success.

Maj. Sweeting was responsible for organizing the air support given to the brigade group whilst operating in the Dunkirk area.

Maj. McClelland also assisted in organizing air support given to the independent army brigade group while operating at Dunkirk.

EXTENSION ASKED

More Time Requested For Signatures To Bretton Woods Agreement

SAVANNAH, Ga.—The committee on membership of the world bank and fund recommended to the board of governors that all Bretton Woods signatory nations, including Russia, be given another six months to sign the agreements and retain their rights as charter members.

The recommendation was made at the suggestion of the U.S. delegation attending the board of governors' meeting at nearby Wilmington Island and was announced by Pierre Mendes, of France, chairman of the committee and governor of the fund for his nation.

In addition to Russia, he said, other nations who have not signed the Bretton Woods agreement are Australia, Haiti, Liberia, New Zealand, Venezuela, Nicaragua and El Salvador.

LATEST PORTRAIT OF PRINCESS ELIZABETH—Princess Elizabeth, who has been figuring more and more in London's social and state news, appears in this new study in a rose-colored face and tulle picture dress.

Movement Of Bread Grains Is Speeded Up

WINNIPEG.—Canada is playing its part in the movement of bread grains to starving millions in Europe, clearing its country wheat bins at a rapid pace to meet the increased demand in the United Kingdom and on the continent.

The visible supply is dwindling rapidly, standing March 12 at only 127,000,000 bushels, the lowest since 1939, while exports have increased to a total of 193,200,000 bushels since the start of the crop year, July 31, 1945. For the same period a year ago exports totalled 93,200,000 bushels.

The weekly report of the board of grain commissioners tells the story of dwindling stocks.

Stocks in country elevators are placed at 42,775,000 bushels compared with 180,250,000 a year ago, while supplies on prairie farms are estimated at around 40,000,000 bushels. Grain in store at the giant lakehead terminals totals only 21,589,832 bushels, a record low.

During the week visible supplies declined 9,500,000 bushels, and the total of 127,000,000 in sight compares with 358,699,610 bushels a year ago. Stocks are placed at 6,616,816 bushels in the terminals on the Pacific coast.

Supplies have been rolling into the Pacific coast ports, with wheat for export given priority over the railways. A heavier rail movement is expected from the lakehead shortly to the eastern seaboard, and a speed-up in the shipments from the prairies is the next move.

Prairie farmers have been asked by the Canadian wheat board to move all available supplies to assure Canada's maximum contribution to food-famished countries.

CANADIAN TRADE

Must Be Broadened Opinion Of Chamber Of Commerce Official

VICTORIA.—Canada will have to broaden her pre-war trade and commerce with other nations if she is to maintain her present standard of living, C. Gordon Cockshutt, president of the Canadian chamber of commerce, said here.

This country was in a good trading position with South America. South American countries "are financially able to finance trade" with Canada, said the Brantford, Ont., industrialist.

Trade with the British Empire had provided the best markets in the past, he continued, but he did not know if this condition would continue.

The Canadian chamber of commerce is in favor of the recent loan to Britain, said Mr. Cockshutt. In his tour across the country, he had found people felt aid to Britain was essential, in Canada's interest as well as Britain's, he said.

A NEW MEDAL

LONDON.—A medal for outstanding achievements in women's work—something like a feminist Nobel Prize—is to be presented each year by the committee for the celebration of international Women's Day.

PROFITABLE SHOW

LONDON.—A cheque for £10,000 (\$45,000), proceeds from the Royal Canadian Navy show, "Meet The Navy", was presented to the King at Buckingham Palace to be set aside for the King George's fund for sailors.

SHORTAGE OF SEED

Growers Can Perform Real Service By Producing More

SASKATOON.—Increased seed production this year was strongly urged by Prof. Manley Champlin, field husbandry department of the University of Saskatchewan.

There was an evident shortage of seed grain caused by conditions during the depression years and to a certain extent by concentration of wartime production of cereals, he said.

The university as well as a number of seed houses were depleted of many varieties of seed in great demand. These varieties were, Prolific spring rye, Dakold fall rye, Valor oats, Colless and Warrior beardless barley and Thatcher wheat, the most generally sown wheat in the province.

Prof. Champlin said the growers will, in increasing production, not only perform a service to agriculture, but find it a profitable enterprise.

The Saskatchewan Field Husbandry Association had played an important part in seed development and had done a great deal in inducing farmers to test good varieties and to build up stocks from small quantities.

JUST MECHANICAL

Fire On Aircraft Carrier In British Port Not Incendiary

DEVONPORT, Devonshire, England.—Crew members and dock firemen battled a fire which broke out in the boiler room of the aircraft carrier, Victorious, berthed here.

The fire, coming after a series of such outbreaks in British ports, aboard liners and cargo vessels, was under control in less than an hour. Cause of the outbreak was considered purely mechanical and was the subject of technical investigation.

PLAN ACCEPTED

PARIS.—Lebanon has accepted the French-British schedule for evacuation by French and British troops. It has been announced. British troops will leave the eastern Mediterranean mandate by April 30. The bulk of French troops will leave by Aug. 31 and all will go by April 1, 1947.

WOMAN WINS CONGRESSIONAL SEAT—Gny Mankin, husband of Helen Douglas Mankin (Dem., Ga.), fledgling congresswoman, predicts proudly that his wife will do "a crackerjack job" in Congress at Washington, D.C. His wife defeated 17 men in the race for the Georgia congressional seat. Rep. Mankin, who topped off her first day in Congress with a news conference, said she had always known she could be a lawyer, a member of the Georgia legislature, and finally a member of Congress. Mankin, a mechanical engineer, shares offices with his wife in Atlanta. Mrs. Mankin has served five terms, totalling 10 years, in the Georgia legislature. Photo shows Mr. and Mrs. Mankin in Washington, D.C.

CLASH WITH BRITISH TROOPS IN CAIRO—Sporadic manifestations against the British in Egypt were climaxed with bloody fighting in Cairo streets. Demonstrations are tied up with unrest in the Moslem world, with the followers of Islam, who worship in mosques are shown above, resenting intrusion of non-believers, particularly those of Jewish faith. Milling mobs in Cairo streets demand evacuation of Egypt by British.

NEW NAVAL STAFF CHIEF

Appointment of Rear-Admiral Howard Emerson Reid, as chief of the naval staff, and his promotion to vice-admiral, has been announced by Hon. Douglas Abbott, minister for the navy. Admiral Reid, former naval member of the combined staff at Washington, has served in warships of many different types; many of them, including the Wm. Spite, while he was on loan to the Royal Navy. He was born at Portage du Fort, P.Q.

Spain Critical Of Course Taken By Three Powers

LONDON.—The Madrid radio likened the United States, France and Britain to "German Nazis and Russian Bolsheviks", and asserted the three powers had "caught the infection" of absolutism and imperialism.

In the most sharply-worded statement out of Spain since the three powers called for peaceful abolition of the Franco regime, the government-controlled station said in a broadcast recorded in London by the Associated Press:

"When considering during the past few days the misguided three-power attempt against Spain, it becomes clear that the so-called western democracies are no longer western and no longer democratic."

"They have caught the infection of that absolutist and imperialist mentality which is to be discovered between the Rhine and the Pacific ocean."

"The government of France, Great Britain and the United States do not respect the freedom of Spain nor her independence, her character, her internal constitution."

"Rather, like the German Nazis and the Russian Bolsheviks, they wish to create that horrible world in which there would be no hope for distinction or diversity. This shows the same tendency as that expressed by Molotov and Ribbentrop as regards freedom of thought."

"We now feel called upon to denounce the agreement between mentalities of imperialist and absolutist psychology which, in full contradiction of the western tradition of freedom, wishes to force the world to be uniform, disregarding the claims of private life and sovereignty."

The broadcast said Spain "by rejecting this imposition," was "defending the rights of all other nations to their political independence."

"This is a principle worth living for and dying for, too, if need be," the broadcast said.

WAYS TO HELP

American People Are Told How They Can Save Wheat

WASHINGTON.—President Truman's famine emergency committee asked Americans to eat 40 per cent. less wheat and 20 per cent. less fats to send more to the hungry abroad and suggested 39 ways to do it.

The suggestions called for open-face pies, buckwheat cakes instead of wheatcakes, open sandwiches, broiled instead of fried fish, substitution of fruit and other desserts for pastries.

Bakers were asked to cut the weight of single loaves of bread and other products by at least 10 per cent.

Restaurants were asked to serve only a single roll or slice of bread, instead of putting baskets of rolls on the tables.

Housewives were requested to use potatoes, for example, as substitutes for bread, to use oat cereals and fruits more often, and to save and re-use fats and oils for cooking purposes.

MASSEY RETIRING

OTTAWA.—Rt. Hon. Vincent Massey, 59, Canadian high commissioner in London for 11 "momentous years" will retire from that post in May, Prime Minister Mackenzie King announced. He made no reference to Mr. Massey's future or his successor.

WANTS TO JOIN

STOCKHOLM.—The government, explaining that it was "giving up a neutrality line which Swedish foreign policy has followed for more than a century," asked parliament for approval to join the United Nations.

Pension Act For Veterans To Be Reviewed Soon

OTTAWA.—The Pension Act, a 27-year-old piece of legislation that has rolled up public obligations of roughly \$60,000,000 a year, will undergo its first parliamentary review in five years sometime after the opening of the second session of the 20th Canadian parliament.

At the end of January the pension liability for the First Great War stood at nearly \$37,000,000, representing payments to 90,000 disabled veterans and dependents. At the same time the liability for the Second Great War stood at more than \$22,000,000, representing payments to more than 45,000 persons.

The last parliamentary review of the act was in 1941 when, on the recommendation of the veterans committee, the Pension Act was amended to provide that veterans who served wholly in Canada or if their dependents could get pension only if their disability or death arose out of or was directly connected with military service.

That is one of numerous points on which the Canadian Legion plans to attack existing legislation.

In the eyes of the Legion, it is "the most serious defect" in the present act. It will recommend to the committee that all veterans who voluntarily enlisted be embraced by the so-called insurance principle.

Alternatively, it will recommend that overseas personnel discharged as medically unfit be able to qualify for a compassionate award of pension.

It urges, too, that pensions for all dependents should not be less than \$30 a month and that no means test be applied to a widowed mother dependent on a deceased veteran son.

One of its strongest appeals will be for a pension rate of \$30 a month for every child and \$40 for orphan children. The present rates are \$15 for the first child, \$12 for the second and \$10 for others with double rates for orphan children.

CARRIED BY PLANE

Supplies For Exercise Muskox Were Dropped At Perry River

CHURCHILL, Man.—Nine tons of supplies vital to Exercise Muskox have been dropped successfully at Perry River—next objective of the moving force—by Dakota aircraft.

The supplies will provide the moving force—now in its 23rd day—with sufficient material to carry it to Cambridge Bay, 130 miles across the ice of Queen Maud gulf.

Six Dakotas participated in the operation, four from this base and two from Yellowknife which arrived within a few minutes of each other despite "almost unbelievable" navigational difficulties.

Proximity of the magnetic pole, about 250 miles from the new base, makes the magnetic compass useless in the area.

DECISION REACHED

India Is Breaking Off Trade Relations With Africa

NEW DELHI.—The government of India announced it will break off trade relations with the Union of South Africa but added further consideration must be given to demands for recall of the Indian high commissioner to the union.

The move followed failure of representations to Prime Minister Smuts of South Africa that legislation aimed at restricting land purchases by Indians in certain areas of South Africa be postponed pending discussions looking to an alternative settlement.

VALID IN APRIL

Three Of Combined Sugar-Preserve Coupons May Be Used

OTTAWA.—Three of the new combined sugar-preserve coupons will become valid during April—\$5 on April 4 and \$0 and \$7 on April 18, the prices board announced.

The announcement said this was not extra sugar but part of the yearly plan for sugar distribution. However, it added that validation of three coupons would give some relief during the current butter shortage by allowing consumers to buy additional preserves as spreads in place of butter.

MORE PROTECTION

LONDON.—The Daily Telegraph said that Foreign Secretary Bevin's personal bodyguard of two detectives is to be increased after the superintendent in charge of the special branch, which provides the detectives, has studied reports of activities of "underground" political movements.

DROUGHT ENDED

AUCKLAND, N.Z.—The drought in Auckland province—the most severe since 1914—ended with a cyclonic storm which brought an average of three inches of rain. Autumn growth in this southern hemisphere dominion now is expected to be prolific in many districts.

HERE and THERE

Churchill and the Russians

Few people remember Churchill as Germanophile in the early days of Nazism. To us he is the incomparable Winston whose great leadership carried the British war effort to a successful climax. Long before anyone thought seriously of German World bitterly attacking Hitler as a menace to civilization. The British looked upon Churchill as a violent radical, a German gad fly, too uncertain to hold public office. He was the only important British who saw the Nazi Monster for what it really was and cried out in speech and press against Hitler. His fearful warnings came true.

Mr. Churchill's speech at Fulton, Missouri was filled with a similar biting Anti-Russian tone. He had gone there at the request of the university president to speak to the college students. President Truman sat on the platform and joined in the applause.

Said Churchill, "The Soviet Union's expansive and proselyting tendencies must be halted if eventual temptation to a trial of strength are to be avoided." His remedy for this situation was an alliance of Britain and the United States in a fraternal association with military ties.

While both London and Washington hastened to deny the proposal for a British-American military Alliance they said nothing about the rest of the speech, except that Mr. Churchill

was speaking only as a private citizen.

For some time United States has stiffened her policy toward Russia. Mr. Bevin dropped British appeasement at the U. N. O. meeting.

Russian reaction to the speech was violent. Every communist dominated paper in the United States and Britain scored the speech as war mongering and capitalist hate, against communism.

This is what they objected to. "From Stettin in the Baltic to Trieste in the Adriatic. An Iron curtain has descended across the continent. Behind that line the population lies in the Soviet sphere and are all subject — not only to Soviet influence but to control from Moscow. — This is not the liberated Europe we ought to build up. Nor is it one which contains the essentials of permanent peace."

Russia has done and is doing everything possible to delay the establishment of peace in every part of the world outside the occupation line drawn by her armies. None of the countries are to be allowed to settle down. A stream of propaganda is allowed to keep them stirred up on which the local communist organizations may thrive. Their fifth column is at work throughout the world.

PROPOSE \$1,290,000 FOR DISTRICT HIGHWAYS

Extensive improvements are in sight for district and local roads in Alberta this year, in addition to the big program for main highways, according to the legislature.

The total appropriation for district and local roads is \$1,290,000, which is an increase of \$240,000 over the 1945 vote.

Officials of the Alberta Motor Association point out that this province is in need of general improvements to the highway system. An important part is played by district roads, because these are the routes that the farmers or primary producers travel to move their products to market.

Good district and local roads are essential if the farm products are to be made available to the cash business that the tourist brings to Alberta.

Undoubtedly there will be a much greater demand for these products. The farmer or dealer must get them to market on time. Good roads provide the answer to many. They ensure that a product is delivered fresh, which is what the tourist wants. He is travelling, pays good cash prices and wants a fresh, quality product.

If a dollar
could write
a diary...

"DEAR DIARY," the dollar would write, "here I am in a great big bright factory, my ears almost deafened by the roar of machinery which turns out shining new appliances that thousands of Canadian housewives were waiting for all through the war."

"I know I'm just one of millions of dollars which the Life Insurance companies are investing now in all sorts of civilian post-war developments... public utilities, power resources, railways, hotels, office buildings, and a whole list of projects which are pressingly needed to get us all back to a normal peacetime footing."

"I came from a country bank, as part of somebody's Life Insurance premium. It's wonderful to feel that I'm doing something socially useful for the future welfare of my country."

25¢ This portion of every dollar of Life Insurance funds is invested in public utilities, industries, etc., and is hard at work in every province creating work and prosperity. The remaining 75 cents are invested in government and municipal bonds, securities and mortgages, etc., yet these funds are always available for the immediate protection of four million policyholders in time of need.

It is
good citizenship
to own

THE NEED IS STILL GREAT

The work of the Red Cross is never finished. Aid must still be carried to the victims of war in many stricken countries.

But the present membership campaign in Alberta is aimed at making the Red Cross strong to help ourselves—to give treatment and care and hope to our own crippled children, to aid our veterans where necessary, to bring training in first-aid and home nursing and safety to our rural communities and to the 42,225 Junior Red Cross members in our schools, and to provide relief and comfort to victims of disaster within our province.

A strong Red Cross is possible only with a strong membership. Lend your support to this great work.

**Ira McBride
Honored**

In the First Ward on Thursday evening a party was given for Ira McBride retiring Choir leader of the first Ward. A fine evening of program, games dancing and a lunch was enjoyed by all. The program was as follows: Prayer — Heber Allen, Remarks — Bishop Hicken, Community Singing under Mrs. Reithman, Vocal Duets — Beth McBride and Mildred Fawns, Jokes — Kay Redd, Remarks — Ken Stone. The program was under the direction of Cyril Layne.

Ira was presented with a pen and pencil set.

Ira has served 64 years as a Choir Leader and figures it as follows: Ward Sunday School Chorister 14 years, Ward Choir Leader 15 years, Stake M. L. A. Leader 3 years and Stake Sunday School leader 18 years and Ward M. L. A. 14 years.

Ken Stone has taken the position as Ward Choir leader in the First Ward.

Wednesday night in the First Ward hall the program was a night of plays. There were three one act plays all of which were very good and well received by the audience. The plays and cast of characters is as follows: "The Florist Shop" Conducted by Norma Smith. Cast: Marie Lamb, Ken Stone, Buddy Wood, Marion Allen, Dean Rolison.

Second Play: — "Little Darling" Conducted by Geneva Erickson. Cast Mrs. A. Roland, Alice Holmes, Jean Kitchen, Gordon Stone, Smalie Red, and Grace Peterson.

The Third Play was, "The Boy Comes Home" Conducted by Myron Holmes. Cast Clayton Obrion, Beth Walker, Marie Lamb, Ellen Winkler, and Myron Holmes.

Between plays Mrs. Emma Dahl entertained at the piano.
